Akron Rubber Development Laboratory, Inc. (ARDL)

To Begin Offering Services In New cGMP Testing Facility

Akron, OH – ARDL has expanded its current array of medical testing capabilities with an all-new GMP Compliant facility. This new laboratory, dedicated to clients in the medical and pharmaceutical fields, will enable ARDL to help minimize clients' risks inherent in bringing new medical, pharmaceutical and biopharmaceutical products to market.

Available cGMP Services Include:

- Extractable/leachable profiles of any polymer based product
- Compendial testing to USP 381 and 661 standards
- Permeation of chemotherapy drugs through medical gloves and other elastomeric film products
- Elastomer and plastic component exhaustive analyses
- Functional testing of medical packaging
- Toxicology related studies
- Pre-formulation drug development testing
